EXPLANATORY NOTES

INTRODUCTION

In view of the difficulty in collecting timely and consistent forest products trade flow data directly from countries using questionnaires, it was decided to use data collected by the United Nations Statistical Office. These data are available in computer readable form in the COMTRADE database.

The data on forest products trade flows were extracted and processed and the trade flow tables have been prepared by the **Planning and Statistical Branch of the Forestry Department** at FAO headquarters in Rome. The tables were constructed with computer programmes developed over several years by FAO. In addition to providing tables for the UN-ECE/FAO Timber Bulletin, these data contribute to the production of the FAO Yearbook of Forest Products providing an alternative source of data on total imports and exports for countries as well as helping to construct the Yearbook directions of trade tables.

ORGANIZATION OF TABLES

The included tables consist of total value of all forest products and tables for aggregates of roundwood, sawnwood, wood-based panels, pulp and paper and paperboard. Detailed tables for individual products follow the aggregate tables. The heading of each table indicates the SITC Rev. 3 division and group codes for the data included in that table. For each product, eight tables are provided covering volume and value for imports and exports for the years 1991 and 1992.

DATA AND METHODOLOGY

The tables in this document were constructed from COMTRADE data available in August 1993. Import tables include data primarily reported by importers, while export tables include data primarily reported by exporters. Information from trading partners was used to estimate data that were missing due to non reporting (data that depend on trading partner information are marked with an asterisk). To illustrate the power of this method, there were 49 individual countries that reported trade of forest products in 1992. These 49 countries traded with 218 trading partners. Thus, the full direction of trade table for 1992 covers trade of 196 exporting countries and 214 importing countries. In the 1991 data, there were 84 reporting countries identifying 199 trading partners indicating trade between 179 exporting and 197 importing countries.

Missing quantity data (or quantity data that are inconsistent with value data) are replaced with data constructed from value and average unit price.

In presenting the data for this publication, the largest 15 exporters (columns) and the largest 25 importers (rows) were included in each table. The importing countries are listed in order of magnitude of their total imports as reported in the import table, while the exporting countries are listed in order of magnitude of their total exports as reported in the export table. All other traders were included either with "Developed NES" (Not Elsewhere Specified) or "Developing NES". Each table represents the data on total world trade available at the date of table construction.

DEFINITIONS

The tables were constructed to match individual codes of SITC Revision 3. Note that pulpwood, sawlogs + veneer logs and other roundwood were not separated in this revision. For non-coniferous roundwood and non-coniferous sawnwood, tables of trade originating in tropical countries and trade originating in non-tropical countries were presented in addition to total world trade of those products.

NOTES EXPLICATIVES

INTRODUCTION

Devant les difficultés rencontrées à collecter de manière ponctuelle des données homogènes sur les flux commerciaux des produits forestiers à l'aide de questionnaires, il a été décidé d'utiliser les données collectées par l'Office Statistique des Nations Unies. Ces chiffres, accessibles par ordinateur, sont stockés dans la base de données COMTRADE.

Le Service de Planification et de Statistique du Département des Forêts au siège de la FAO à Rome a extrait et traité les données relatives aux flux commerciaux des produits forestiers et a préparé les tableaux des flux commerciaux. Ces tableaux ont été conçus à l'aide de logiciels développés sur plusieurs années à la FAO. Outre leur insertion dans le Bulletin du Bois de la CEE-ONU/FAO, ces chiffres apparaîtront dans l'Annuaire des Produits Forestiers de la FAO, constituant ainsi pour les pays une autre source d'information sur les importations et les exportations totales, et également une aide pour produire les tableaux des flux commerciaux publiés dans l'Annuaire.

ORGANISATION DES TABLEAUX

Dans les tableaux de ce Bulletin, on trouve la valeur totale de tous les produits forestiers ainsi que les agrégations pour les bois ronds, les sciages, les panneaux dérivés du bois, les pâtes et les papiers et cartons. Des tableaux détaillés pour chaque produit suivent les tableaux d'agrégation. Le titre de chaque tableau donne les codes des divisions et groupes de la CTCI Révision 3 relatifs aux produits qui figurent dans ce tableau. Pour chaque produit, on publie huit tableaux comportant les quantités et les valeurs des importations et des exportations pour les années 1991 et 1992.

DONNEES ET METHODOLOGIE

On a constitué les tableaux publiés dans ce Bulletin à l'aide des chiffres du COMTRADE disponibles en août 1993. Les tableaux des importations indiquent des chiffres initialement fournis par les importateurs, tandis que les tableaux des exportations montrent ceux fournis par les exportateurs. On a utilisé des informations provenant des partenaires commerciaux pour estimer les données non disponibles. (Ces chiffres dérivés des partenaires commerciaux sont marqués d'un astérisque). Pour montrer la puissance de cette méthode, 49 pays ont individuellement fourni leurs chiffres du commerce des produits forestiers en 1992. Ces 49 pays ont totalisé 218 partenaires commerciaux. En conséquence, le tableau où figure le total des flux commerciaux en 1992 englobe le commerce de 196 pays exportateurs et 214 pays importateurs. Pour l'année 1991, 84 pays ont fourni des renseignements sur leur commerce avec 199 partenaires en identifiant 179 pays exportateurs et 197 pays importateurs.

Quand les chiffres de quantité n'étaient pas disponibles (ou lorsqu'il y avait incohérence entre quantité et valeur), on a fait des estimations à partir des valeurs et des prix unitaires moyens.

Dans chaque tableau, apparaissent les 15 plus importants exportateurs (colonnes) et les 25 plus importants importateurs (lignes). Les pays importateurs figurent par ordre d'importance de leurs importations totales, comme indiquées dans le tableau des importations, tandis que les exportateurs sont classés par ordre de grandeur de leurs exportations. Tous les autres pays sont inclus sous les rubriques "Developed NES" (Pays développés, Non Désignés Ailleurs) ou "Developing NES" (Pays en développement, Non Désignés Ailleurs). Chaque tableau fournit les chiffres du commerce mondial disponibles au moment où il a été rempli.

DEFINITIONS

On a complété les tableaux sur la base des codes spécifiques de la CTCI Révision 3. Le lecteur est prié de noter que le bois de trituration, les grumes pour sciages et les grumes pour placages ainsi que les autres bois ronds ne sont pas identifiés séparément dans cette révision. Pour les bois ronds feuillus et les sciages feuillus, les tableaux du commerce en provenance des pays tropicaux et tempérés sont publiés en plus des tableaux concernant le commerce total.
